Keywords: Correction, HIV, Mental Health

Corrigendum

Recently, we published an article in the Health Scope journal entitled “Mental Health Status of Patients with HIV/AIDS in the South of Iran” (1). We are regret to inform that we missed referencing the following sentence from the paper written by Haghdoost et al. (2011) (2): “It is suggested that by 2014 about 106000 individuals in Iran will be living with HIV infection and there are estimated to be approximately 7,000 new cases annually.” We contacted the publisher of this journal with email and telephone contacts to add the missed reference to the article, how-

ever it was impossible as the article was recently published. Authors very much apologize authors of this paper and also the Health Scope journal for this discomfort.
