This retracts the article "[Retracted Article: The Effects of Family-Centered Education Based on the Health Belief Model on Knowledge and Attitude Among the Parents of Children with Asthma: A Randomized Controlled Clinical Trial](#)".

We have retracted this article (1) due to the Editor-in-Chief request on behalf of the editorial board and the second committee of Ethics in the Publisher. To read more retraction regulations in the publisher, please read it at https://brief.land/jjcdc/knowledgebase/category/tree.html#retraction_regulations.html. This article is retracted from our journal following a report from a whistleblower (December 6, 2020) and because it was already published in another journal (<http://unmf.umsu.ac.ir/article-1-3851-fa.html>) and is a case of "republishing."

Based on our policy (<https://brief.land/jjcdc/knowledgebase/category/tree.html#republishing1.html>), any republishing (in other languages) is prohibited. Furthermore, the author(s) failed to explain why it is relevant to present it again in a different context in another journal without permission from the first journal. Besides, the case was not correctly cross-referenced in the acknowledgment section. We are committed to following any suspected malpractice case in primary and secondary committees. To read more about the way of approaching ethical claims (allegation of misconduct), please read the below page: https://brief.land/jjcdc/knowledgebase/category/tree.html#allegations_of_misconduct.html.
