

Appendix

Tables

- **Appendix 1:** The detail of 72 countries with more than 1000 confirmed cases of COVID-19 retrieves on 14 April 2020.
- **Appendix2.** Result of bivariate correlation between number of tests, CFR, and RR.
- **Appendix3.** Results of univariate linear regression analysis of variables of interest with the number of total COVID-19 diagnostic tests
- **Appendix4.** Results of multiple ridge regression analyses for number of total Covid-19 diagnostic tests, CFR and RR after adjustment for population and GDP in each preparedness levels
- **Appendix5.** Results of multiple ridge regression analyses to determine parameters most predictive of the number of total COVID-19 diagnostic tests, CFR and RR
- **Appendix6.** GHS index and its component association with the number of total COVID-19 diagnostic tests, CFR and RR in different World Bank countries classification
- **Appendix7.** GHS index association with the number of total COVID-19 diagnostic tests, CFR and RR in different average-bad classifications
- **Appendix8.** Association between GHS index and its component with the number of total COVID-19 diagnostic tests, CFR and RR in different Continents
- **Appendix9.** Indices association with the number of total COVID-19 diagnostic tests, CFR and RR in average-bad classification of GHS index
- **Appendix10.** Results of multiple ridge regression analyses to determine parameters most predictive of the number of total COVID-19 diagnostic tests, CFR and RR

Figures

- **Appendix 11.** The association between A, Prevention index; B, Detection index; C, Rapid respond index; D, Health system index; E, Compliance with international standards index; and F, Risk environment index with total number of COVID-19 tests
- **Appendix 12.** The association between A, Prevention index; B, Detection index; C, Rapid respond index; D, Health system index; E, Compliance with international standards index; and F, Risk environment index with case fatality rate
- **Appendix 13.** The association between A, Prevention index; B, Detection index; C, Rapid respond index; D, Health system index; E, Compliance with international standards index; and F, Risk environment index with case fatality rate

Appendix1: The detail of 72 countries with more than 1000 confirmed cases of COVID-19 retrieves on 14 April 2020.

Country	Population	GDP	Total Tests	Tests/1M pop	CFR	RR	GHS index	GHS categories
