Received 2023 August 07; Accepted 2023 August 22.

This retracts the article "[Retracted Article] Methylation of the Wnt Signaling Antagonist, Wnt Inhibitory Factor 1 and Dickkopf-1 Genes in Acute Myeloid Leukemia at the Time of Diagnosis".

Based on a report by a whistleblower (Ticket #493444, June 25, 2023) about possible malpractices in ethics, we found significant similarities between the three below-mentioned articles [1-3].

Link of Published Article:
https://brieflands.com/articles/zjrms-5874.html
https://jims.mui.ac.ir/article_14461.html?lang=en
https://ijbc.ir/article-1-517-en.html

Consequently, we started our investigations and collected details of explanations from all parties. Finally, the Committee of Ethics in Research and Publications in Zahedan University of Medical Sciences plus the secondary ethics committee of the publisher concluded to retract this article from our journal (Registration Number: #495916, Date: July 31, 2023) because it was already published in another journal and is a case of "republishing." Respecting our policy, it is a definite case of redundancy and double-Publication. As a result of this, we apologize to our readers for any inconvenience. The authors were already informed about this decision.
