AUTHORS' RESPONSE TO REVIEWERS

Authors' reply to reviewers

The next pages contain the authors' point-by-point reply to the comments of this revision round, as submitted with the revised manuscript. It is published as the authors wrote it.

Response to reviewers

Dear respected reviewers

Thanks for your precious comments that enriched our manuscript. We revies manuscript as below:

Reviewers' Comments:

Reviewer 1:

background: similar studies in Iran and world need to be add.

Response: Thanks for your comments. We added similar studies.

the place of study should be added.

Response: Thanks for your comments. We added it.

sampling method and sample size formula need to be added.

Response: Thanks for your comments. We added it.

the regression analysis should be explained in the article.

Response: Thanks for your comments. We explained it.

numbers of tables should be decreased and necessaries parameters should be reports in tables, necessarily items should be removed due to statistics counselors.

Response: Thanks for your comments. Because the results of table 1, 2 and 3 had been explained completely in result section, we deleted these table for prevention of duplication and reduced tables.

in the abstract: regression results need to be reported.

Response: Thanks for your comments. We mentioned it.

Reviewer 2:

This article was published in another journal

Response: Thanks for your comments. Our manuscript is not published in any journal, and we just publish it in preprints websites.

> Associate Editor's Comments:

Associate Editor 1:

Dear EIC

Concerning reviewer comments, the manuscript should be considered for publication after addressing the below comments: background: similar studies in Iran and world need to be add.

Response: Thanks for your comments. We added similar studies.

the place of study should be added.

Response: Thanks for your comments. We added it.

sampling method and sample size formula need to be added.
