1. Reanalyze your data using repeated two-way ANOVA.
2. There were some grammatical errors in the text.

AUTHORS' RESPONSE TO REVIEWERS

Authors' reply to reviewers

The next pages contain the authors' point-by-point reply to the comments of this revision round, as submitted with the revised manuscript. It is published as the authors wrote it.

Dear Editor,

Thank you for your valuable and useful comments and suggestions. We have modified the manuscript accordingly. Revised sections are highlighted in the article and detailed corrections are listed below point by point:

- We revised the manuscript carefully to avoid language errors. In addition, we asked several colleagues who are skilled authors to check the English. We believe that the language is now acceptable for the reviewer.
- The results of repeated measures ANOVA were presented in Table 3.
- The introduction section was revised and similar sentences were deleted or merged.
- Inclusion criteria were modified: scoring above the mean on the Mississippi Scale for Combat-Related Posttraumatic Stress Disorder
- The statistical population in this study was the war wounded who referred to psychological centers affiliated to the Martyrs and Veterans Affairs Foundation.
- Regarding the scoring of the questionnaire and how to interpret the scores, more details were provided in the method section.
- The Computer-Based Cognitive Rehabilitation Package (Captain's Log) was an educational exercise package and is unscored.
- Descriptive results were presented only in Table 2 and their repetition in the text was avoided.
- More details about the timing of the follow-up phase were provided in the method section.
- The results of related studies were mentioned in the discussion section.

Best regards
