Dear EIC,
According to our reviewers' comments, this manuscript is recommended for publication in AMHS. Hence, the following comments should be addressed:
1_The second questionnaire that determines the level of nurses' knowledge about fungal infections should be attached.
2_Why have hospital infections not been investigated in general?
3_In the second questionnaire, are fungal infections mentioned in general, or are questions asked according to the type of fungus, such as Aspergillus or yeast?
Best regards

Editor-in-Chief
