About this report

This open peer review (OPR) report shows the public comments made on this article during peer review, by the reviewers, the associate editor and the editor-in-chief, for every revision round, together with the authors' replies. Comments appear only with the consent of the people who wrote them. Reviewers who chose to sign their report are named; the others are shown as "Referee". Comments are edited for language only, and confidential remarks to the editors are not included.

MINOR REVISION 27 Jun 2023

Dear authors,
I would like to thank you for the time and effort involved in this study. The topic is within the scope of the journal and has enough novelty to attract readers. This is an interesting manuscript with excellent data presentation. In my opinion, it can be considered for publication after minor revision. Please address my comments:
Title and abstract
1-The type of study should be mentioned in the method section of the abstract. Please omit it from the background and add it to the method section.
2-Keywords should be based on MeSH terms. Please check them.
3-Abbreviations such as COVID-19, SARS-COV-2, and … should be written out in full at first use. Please check this.
Introduction
4-Please add the objective of your study to the introduction section.
Method
5-Please mention the time of the study in the method section.
6- Was data collection based on the census method or on sampling? If it was based on sampling, please describe how the sample size was estimated and which sampling method was used. If not, please mention that it was based on the census method.
7-Please add some sentences describing data analysis.
Result
8-Data are comprehensively presented in table 2, which is appreciated.
Best regards
