This is an expression of concern about the following article: [Association of interleukin 18 gene promoter polymorphisms with HBV recurrence after liver transplantation in Han Chinese population](#)

Dear Readers,

The Editors and Publisher wish to inform readers that a potential publication ethics concern has been brought to our attention regarding one of the published articles (1).

The concern was reported by an anonymous individual (#639994). In accordance with the journal's policies and established publication ethics guidelines, the matter is currently under review and investigation by the journal and the publisher.

At this stage, no conclusions have been reached. Readers will be notified of the outcome once the investigation has been completed and a final decision has been made.

Sincerely Yours

Abbas Ali Imani Fooladi

Applied Microbiology Research Center, Systems Biology and Poisonings Institute, Baqiyatallah University of Medical Sciences, Tehran, Iran

Editor in Chief of Hepatitis Monthly
