About this report

This open peer review (OPR) report shows the public comments made on this article during peer review, by the reviewers, the associate editor and the editor-in-chief, for every revision round, together with the authors' replies. Comments appear only with the consent of the people who wrote them. Reviewers who chose to sign their report are named; the others are shown as "Referee". Comments are edited for language only, and confidential remarks to the editors are not included.

MINOR REVISION 7 Sep 2022

The text needs English editing.
Since a formula was used for sample size calculation, there is no need to mention software.
Please check the reference list to ensure that the data for each reference are complete.
Please add the unit for each variable in the tables.
Add the participant flow diagram based on CONSORT guidelines.
Mention the limitations of the study at the end of the discussion.
Please mention whether the participants were blinded and, if so, how.

Revision 1

AUTHORS' RESPONSE TO REVIEWERS

Authors' reply to reviewers

The next pages contain the authors' point-by-point reply to the comments of this revision round, as submitted with the revised manuscript. It is published as the authors wrote it.

.The English literature is checked by an application

.The limitations of the study have been added at the end of the discussion

.Name of the software were deleted

.The type of study was double-blind which was mentioned in methods

.The references were checked by Endnote

Unites of variables were inserted in the table but some of which do not have units and the quality were measured, for example the amount of pain or quality .of sleep

About the flow chart of CONSORT, we did not save the information of those who were excluded due to inclusion and exclusion criteria, so we cannot write down the flowchart, beside the word count is currently over the limitation to add new .information
