OPEN PEER REVIEW

Dear Associate Editor:

About the manuscript “Ectopic Expression of miRNA-21, miRNA-205 in Non-Small Cell Lung Cancer”.

They were followed:

1- The grammar of the manuscript needs to be revised. It was written badly.

This comment has been corrected.

2- The obtained statistical results should be written in the abstract (for example the fold change of the genes expression and the T-test results).

This comment has been corrected.

3- The inclusion criteria of the selected patients were added to the method section.

This comment has been corrected.

4- The method section has been written badly. It should be rewritten.

This comment has been corrected.

5- The sequence of primers used in the expression analysis has not been mentioned. They should be added to the materials and method section.

Micro RNA specific kits have been used to test the expression and the primer sequence is not mentioned in these kits.

Regards

OPEN PEER REVIEW

Dear Associate Editor:

About the manuscript “Ectopic Expression of miRNA-21, miRNA-205 in Non-Small Cell Lung Cancer”.

They were followed:

1- English errors in the text was corrected.
2- In the Table 1, the abbreviations such as P and N was corrected.(*N= Number of patient group, **P=Value)
3- In the present study, commercial kits have been used for the study of miracles and their primer sequences have not been mentioned.
