

Appendix 1: The nine stages of community readiness based on the community readiness model with corresponding scores (13)

Stage (Readiness Score)	Description
1. No awareness (1-1.99)	The issue is normative, accepted, and not generally recognized by the community or leaders as a problem.
2. Denial/Resistance (2-2.99)	Only a few community members recognize that the issue is a concern; the community and leadership do not support dealing with the matter.
3. Vague awareness (3-3.99)	Community members and leaders believe that the issue may be a concern, but there is no immediate motivation to address it.
4. Preplanning (4-4.99)	Community members and leaders acknowledge that the issue is a concern; the efforts are not focused or detailed.
5. Preparation (5-5.99)	Most community members have basic knowledge of the issue and are concerned about it; leaders are planning, some resources have been identified, and community members and leaders are actively working to secure resources.
6. Initiation (6-6.99)	Leaders play a crucial role in planning efforts to address the problem; enough information is available, and resources have been allocated to support efforts.
7. Stabilization (7-7.99)	Most community members have more than basic knowledge of local efforts and issues; leaders are actively involved in ensuring or improving the long-term viability of efforts.
8. Confirmation/ Expansion (8-8.99)	Efforts are in place; community members strongly support efforts; leaders play a crucial role in expanding and improving efforts.
9. High level of community ownership (9-9.99)	Most community members have sophisticated and detailed knowledge of local efforts and issues; leaders continually review evaluation results and modify financial support; resources are secured.

*ND: Not determined; ^aMean; ^bMean±SD.

The scores are calculated based on the average scores for each community dimension across interviews, and the scores are finally rounded down to correspond to one of the nine stages of readiness

The scores are calculated from a 12-item checklist.
