MINOR REVISION 11 Aug 2023

Thank you for submitting your manuscript for consideration for publication in the Iranian Journal of Psychiatry and Behavioral Sciences. Your paper has been evaluated by external peer reviewers. Please revise your manuscript according to the reviewers' comments. I would appreciate it if you could make the revisions as soon as possible.

After revision, authors are obliged to upload a Word file containing the reviewers' comments and their responses to all comments, one by one.

Besides, please pay attention to the word count limitation:
Word count limits are specified at this link: http://kowsarpub.com/en/index.php/services/for-authors/895-word-count

We look forward to receiving your revised manuscript. Thank you for sending your work to the Iranian Journal of Psychiatry and Behavioral Sciences. Revised text must be highlighted in the full manuscript file.

AUTHORS' RESPONSE TO REVIEWERS

Authors' reply to reviewers

The next pages contain the authors' point-by-point reply to the comments of this revision round, as submitted with the revised manuscript. It is published as the authors wrote it.

Response to reviewers' comments

Manuscript ID 135963

Dear Editor,

Thank you for giving us the opportunity to submit a revised draft of our manuscript titled "***The Relationship between Perceived Social Support and Distress Tolerance in Parents with Phenylketonuria Children: The mediator role of Self-compassion"*** to the Iranian Journal of Psychiatry and Behavioral Sciences. We appreciate the time and effort that you and the reviewers have dedicated to providing your valuable feedback on this manuscript. We are grateful to the reviewers for their insightful comments on this paper. We have been able to incorporate changes to reflect most of the suggestions provided by the reviewers.

Below we provide the point-by-point responses. All modifications in the manuscript have been highlighted in yellow.

Associate Editor's Comments:

Comment 1: *" There is no need to bring model fit indices in the abstract.*"

Response: Thank you for pointing this out. The model fit indices were removed and bootstrap results were given.

Comment 2: *" The reported R2 values indicate the proportion of variance explained by the model, but it is unclear whether these values are considered strong or weak."*

Response: Thanks for your kind reminders. The classification method (weak to strong) of the reported R2 values based on the suggestion of Chin and Marcoulides(1998) was explained

Comment 3: *" It's better to mention the abbreviated version of Phenylketonuria (PKU) the first time it appears in the text, except for the title; and use the abbreviation from thereafter."*

Response: Thank you for pointing this out. Abbreviated terms are used throughout the text.

Comment 4: *" The conclusion in the abstract is somewhat general and could be more specific in summarizing the key findings and their implications."*

Response: We agree with this and accordingly, the proposed idea was modified to emphasize this point and highlighted.

Comment 5: *" There is a claim about Iranian families in lines 65-67, yet it references a British citation at the end."*

Response: Unfortunately, a mistake has occurred and instead of reference number 2, reference number 1 has been inserted. This error has been corrected.

Comment 6: '' *In line 169, the Persian year "1400" should be converted to the Georgian calendar.* ''

Response: Thank you for pointing this out. The year was entered according to the Georgian calendar.

Comment 7: ***In the Procedure section (line 189), replace "the sample people" with "participants."***

Response: Thank you for this suggestion. Corrected and highlighted

Comment 8: ''*In line 192, please replace "the first author's University." with the actual name of the university.* ''

Response: We agree with this and accordingly, the name of the University of Mohaghegh Ardabili was included and highlighted to emphasize this point.

Comment 9: ***"In line 237, change "subsequent analyzes" to "subsequent analyses."***

Response: Corrected and highlighted

Comment 10: ***"Line 274 seems to be missing "other" after "significant."***

Response: Corrected and highlighted

Comment 11: ***'' In Table 3, it appears that "SS" stands for social support; consider introducing abbreviations below the respective table or figure.*''**

Response: Thank you for pointing this out. Abbreviations used are introduced below the tables and figures.

We look forward to hearing from you in due time regarding our submission and to respond to any further questions and comments you may have.

Sincerely,

Elham Fathi, Ph. D.

Counseling & Health Center Director and Assistant Professor of
Hazrat-e Masoumeh University,Qom, Iran.
