Revision 1

AUTHORS' RESPONSE TO REVIEWERS

Authors' reply to reviewers

The next pages contain the authors' point-by-point reply to the comments of this revision round, as submitted with the revised manuscript. It is published as the authors wrote it.

Dear editors and reviewers

Thanks for reaching out to us regarding the manuscript entitled " Characteristic features of computerized tomography scan (CT scan) in COVID-19 patients and its relationship with the mortality rate ". We believe that these comments have helped us enhance the quality of the manuscript. We also have done our best to revise as well as improve the paper according to the comments. Herewith, we provided the authors' response to each comment right after each statement. Also, all the changes have been highlighted in the manuscript. Please feel free to contact us if you need further information.

Yours sincerely

Hamed Bazrafshan M.D.

Corresponding author, Associate Professor of Cardiology, Cardiovascular Research Center, Shiraz University of Medical Sciences, Shiraz, IR Iran, Shiraz, Iran.

Reviewer 1

Add the type of study, sample size, sampling method, ethical consideration, parameter and variables, tools, method of measure of variables, statistical methods and software.

Result is not suitable in report fashion. Add the correlation coefficient

Main body.

Method:

Add the type of study, sampling method, tools, method of measure of variables, statistical methods.

This version of spss software have not validated license. The version 16 is free version in our country.

Thank you for pointing out these shortcomings and also your valuable notes. We revised the manuscript based on your comment.
