AUTHORS' RESPONSE TO REVIEWERS

Authors' reply to reviewers

The next pages contain the authors' point-by-point reply to the comments of this revision round, as submitted with the revised manuscript. It is published as the authors wrote it.

Ref: Submission ID 128869

Dear editor

Thanks for your deliberate review, we addressed all the comments point by point based on the reviewer's request. The modifications have been highlighted in the text.

Reviewer Comments:

Reviewer 1

- State specific objectives, including any prespecified hypotheses

Response: Corrected, the changes on page 1 lines 8 to 10 and page 2 lines 99 to 101 are highlighted.

- Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable.

Response: added. Changes on page 3 of lines 119 to 121 are highlighted.

- Explain how the study size was arrived at

Response: The description is highlighted in lines 114 to 117

- Explain how missing data were addressed.

Response: Description On page 3, line 116 is highlighted

- Describe any sensitivity analyses.

Response: N/A

- Give reasons for non-participation at each stage1

Response: Description On page 3, lines 111 to 113 are highlighted

- Indicate number of participants with missing data for each variable of interest.

Response: Description On page 3, line 116 is highlighted

- Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias.

Response: Added, description on page 7, lines 331 to 335 are highlighted

- Discuss the generalizability (external validity) of the study results.

Response: Added, description on page 7, lines 334 to 335 are highlighted

Reviewer 2

- The purpose of the study with different sentences at the end of the summary, introduction, etc. mentioned, please be the same.

Response: Corrected, the changes on page 1 lines 8 to 10 and page 2 lines 99 to 101 are highlighted.

- The conclusion in the Abstract section needs to be corrected. One of the results of the study is good neurological status during discharge, which indicates proper post-resuscitation care, while in conclusion, effective post-resuscitation care is suggested.

Response: Was corrected. Changes on page 1, lines 21 to 24 are highlighted.

- Despite the fact that all the content is stated, but it does not have a logical structuring and confuses the reader, please be structured, including: design, sample, data collection, etc.

Response: Was corrected. Changes on pages 3 and 4, lines 103 to 170 are highlighted.

Multiple references are used for a sentence, limit the number of references if possible. Also, some paragraphs are too long and can be broken down into two or more paragraphs if possible.

Response: Was corrected. Changes on pages 5 and 6, lines 245 to 268 are highlighted.

Best regards
