MAJOR REVISION 7 Jul 2023

Dear author,
After reviewing your manuscript, I see potential, but there are areas that require improvement to match the standards of our journal.
I suggest scientific and English editing throughout the manuscript. Also, I recommend revising the manuscript according to the attached file and using Moshashai et al.'s article as a model for guidance in revising some sections of the manuscript.

Please consider my comments and suggestions carefully and revise your manuscript accordingly.
With appropriate revisions and editing, your manuscript has the potential to make a valuable contribution to the field.
Thank you for your hard work and dedication to this research project.
I am looking forward to reviewing the revised manuscript.

With regards,
