About this report

This open peer review (OPR) report shows the public comments made on this article during peer review, by the reviewers, the associate editor and the editor-in-chief, for every revision round, together with the authors' replies. Comments appear only with the consent of the people who wrote them. Reviewers who chose to sign their report are named; the others are shown as "Referee". Comments are edited for language only, and confidential remarks to the editors are not included.

Referee 1 Reviewer

MINOR REVISION 31 Dec 2024

Dear Authors,
Thank you for submitting your manuscript to our journal. Your work addresses an important topic, and we appreciate your research efforts. Below, I have outlined several comments and suggestions to improve the clarity and quality of your manuscript. I hope these recommendations are helpful, and I wish you success with your revisions.

1. The manuscript requires a thorough review for spelling and grammatical errors.
2. Please include a graphical abstract at the beginning of the manuscript.
3. Clearly illustrate the four animal groups using a schematic diagram.
4. Incorporate images related to the execution of Real-time PCR tests and their results into the "Methods" and "Results" sections.
5. The charts' captions should be rewritten to be more descriptive and clear. Additionally, consider presenting the charts with shading (hashed patterns) to improve their readability.

I hope these suggestions enhance the quality of your manuscript.

Associate Editor

MINOR REVISION 1 Jan 2025

Dear Authors

I hope this message finds you well.

I am writing to you regarding your manuscript entitled “Alleviation of Renal Ischemia-Reperfusion Induced Injuries by Anti-Inflammatory Attributes of Thyme Essential Oil in Male Rats: A Biochemical and Stereological Study,” which has undergone minor revision in the Journal of Reports in Pharmaceutical Sciences.

Given the minor revisions requested, I would appreciate it if you could address the comments point by point.
Best regards,
E.I.C
