About this report

This open peer review (OPR) report shows the public comments made on this article during peer review, by the reviewers, the associate editor and the editor-in-chief, for every revision round, together with the authors' replies. Comments appear only with the consent of the people who wrote them. Reviewers who chose to sign their report are named; the others are shown as "Referee". Comments are edited for language only, and confidential remarks to the editors are not included.

Parvaneh Hatami Reviewer

ACCEPT 14 Dec 2021

This is a well-written and concise manuscript about the use of dermoscopy in the diagnosis of 3 common dermatoses with hypopigmentation or depigmentation.
I think it deserves to be published in this journal.
