Associate Editor

MINOR REVISION 7 Jan 2024

Dear Editor,

I am writing to inform your esteemed readership about the recent completion of a significant anthropometric study conducted on the obturator foramen, focusing on its implications for the surgical treatment of urinary incontinence in the adult female population of southwestern Iran. I am pleased to share that, based on my evaluation, the article has been submitted to Comprehensive Health and Biomedical Studies for publication. The information presented in this study contributes significantly to the existing body of knowledge in the field and may influence future medical practices and treatment protocols. By disseminating these findings through your reputable journal, we aim to reach a broader audience, including healthcare professionals, researchers, and the general public, fostering awareness and understanding of this critical aspect of healthcare. I eagerly anticipate the possibility of seeing this research published in Comprehensive Health and Biomedical Studies and shared with your readership.

Sincerely

Editor-in-Chief

MINOR REVISION 7 Jan 2024

Manuscript Number: 142138

Dear Dr Karimi,

Thank you for submitting your manuscript to Comprehensive Health and Biomedical Studies.

I have completed my evaluation of your manuscript. The reviewers recommend reconsideration of your manuscript following minor revision. I invite you to resubmit your manuscript after addressing the comments below.
When revising your manuscript, please consider all issues mentioned in the reviewers' comments carefully: please outline every change made in response to their comments and provide suitable rebuttals for any comments not addressed. Please note that your revised submission may need to be re-reviewed.
