AUTHORS' RESPONSE TO REVIEWERS

Authors' reply to reviewers

The next pages contain the authors' point-by-point reply to the comments of this revision round, as submitted with the revised manuscript. It is published as the authors wrote it.

,Dear Reviewer 1

I want to thank you for your time. I found your suggestions very helpful and these are the revisions I made. I hope you find it beneficial.

1- *In the abstract, you described that it is not easy to evaluate the serum of patients. What are your suggestions for it?*

I added, "Therefore, saliva evaluation has been proposed in recent years as an alternative."

2- *Please provide more information and more details. why is the grouping of people unclear?*

This part has been discussed in detail in materials and methods.

3-*Describe your work limitations.*

This part has been added to the discussion part.

4-*If possible, describe the previous comparative work.*

This has been discussed in the discussion part in detail.

5-*The correlation table and figures should not be written in Persian and in Figure 1 in Part A sodium is saliva, whereas saliva should be brought in.*

More clarification has been added to the title of the figure 1.

Corresponding Author,

Dr. Kimia Ghods
