OPEN PEER REVIEW

Open Peer Review (OPR)

As a new feature for progressing towards transparency, we decided to open a new window for all of our editors as well as authors titled "**Open Peer Review**". We hope by this new facility, our reviewers will be more motivated and authors will be more satisfied with the review process. We believe that publishing our peer review reports could make a transparent and clear environment for all our efforts within a journal, but not all reviewers tend to publish their comments.

What is "Open Peer Review" process?

An "Open Peer Review" process is making the details of all review process (including reviewers, associate editors, and EICs comments) as "Public" as it is agreed by EIC, Authors, and reviewers.

Advantages of "Open Peer Review" process

- More transparency, constructiveness and tactful comments of the peer review process: leads to an increase in the quality of reviews
- More motivations for all involved roles in the review process
- Authors' satisfactions from the review process: Increases honesty between authors and reviewers
- Education of both authors and new students
- Prevents reviewers from following their individual agendas and leading to the detection of reviewers' conflicts of interests

Peer Review Report for "Hypoparathyroidism After COVID-19 Pneumonia"

Author(s): Mahmoud Dianatfar, Mojgan Sanjari, Behnam Dalfardi

Review Timeline:

Submit Date: 8 May 2021
Revised Date: 23 May 2021
Accepted Date: 23 May 2021

Revision (0)

Here, you can see the **Reviewers**, **Associate Editors** and **EICs'** comments from the beginning to the end of the revision process.

REFEREE: EIC | **Revision** (0)

9 May 2021

Dear Authors,
The case report is of interest . However it is advised to change the format to letter to the editor. Meanwhile as the text should be more cautious on causative role of SARS-CoV-2 and one should consider association , or promotion as well .
Thanks.

OPEN PEER REVIEW

Revision (1)

Reply to Reviewers

Ideally, the reviewing process can significantly improve the submitted manuscripts by allowing the authors to take into account the advice of reviewers. Author(s) must reply to all reviewers' comments in a separate Word file, point by point. A "**Reply to Reviewers**" document is submitted along with revised manuscript during submission of revised files, summarizing the changes that the authors made in response to the reviewers' comments. The responses to reviewers' comments specifies how the authors addressed each comment the reviewers made.

You can read the authors' responses to the reviewers' comments in the next page.

Dear Editor-in-Chief;

I hope all is well. We tried to revise the paper according to your recommendations.

Your Comments:

Comment 1: it is advised to change the format to letter to the editor: *We changed the format of our paper to "Letter to the Editor"*.

Comment 2: Meanwhile as the text should be more cautious on causative role of SARS-CoV-2 and one should consider association, or promotion as well: *We added some new explanations to the text (Page: 4; Paragraph: 2; Lines: 11 to 13)*

We hope this revised manuscript meet your qualitative standards for publication.

With Kind Regards
