About this report

This open peer review (OPR) report shows the public comments made on this article during peer review, by the reviewers, the associate editor and the editor-in-chief, for every revision round, together with the authors' replies. Comments appear only with the consent of the people who wrote them. Reviewers who chose to sign their report are named; the others are shown as "Referee". Comments are edited for language only, and confidential remarks to the editors are not included.

Revision 1

AUTHORS' RESPONSE TO REVIEWERS

Authors' reply to reviewers

The next pages contain the authors' point-by-point reply to the comments of this revision round, as submitted with the revised manuscript. It is published as the authors wrote it.

Author response to Editors' Comment

No.	Editors' / reviewers' comment	Response to comment	Lines
	1-Write all keywords according to the MeSH terms.	amended	abstract
	2- -In the line 62, please reference to this sentence: Therefore, the number of male nursing students has increased so that in recent years, the rate of male and female nursing students' admissions in Iran has been almost equal.	amended	62
	3- In the line 64, please reference to this sentence: Owing to the increasing number of male nurses and economic pressures and insufficient salary of nurses, male nurses are more willing to marry their female counterparts so that	amended	65

	marriage between nurses has become commonplace in recent years in the country.		
	4- Explain how the study size was arrived at.	amended	77
	5- Inclusion criteria are incomplete.	amended	81
	6-Higher-income husbands may be more dissatisfied with their wives' work. Did you not specify the income limits of the spouses as inclusion criteria?	Explained as limitation in the end of manuscript	200
	7- You have listed only couples who have both been nurses as inclusion criteria. How have you examined marital satisfaction in couples whose husbands are not nurses?	This matter revised in the inclusion criteria	82
	8- Did your study not have exclusion criteria?	exclusion criteria added in the method section	84

	9- Explain how missing data were addressed.	incomplete questionnaires were excluded because of missing data.	80
