Referee 1 Reviewer

MINOR REVISION 21 Jul 2021

The manuscript is well written and has a sound methodology, but some corrections are needed, as listed below:
1. All keywords should be in MeSH.
2. All parts of the manuscript need grammatical editing.
3. All instances of "et al" should be italicized.
4. References need correction according to the journal's format.

Associate Editor

MINOR REVISION 15 Aug 2021

Dear Author:
Your manuscript was reviewed. There are some reviewers' comments at the bottom of the letter.

best Regards.

Editor-in-Chief

MINOR REVISION 15 Aug 2021

Dear Author:
Thank you very much for submitting your manuscript to the Thrita journal. Please revise your final manuscript based on the reviewers' comments and resubmit the revised draft on our website.
Regards

AUTHORS' RESPONSE TO REVIEWERS

Authors' reply to reviewers

The next pages contain the authors' point-by-point reply to the comments of this revision round, as submitted with the revised manuscript. It is published as the authors wrote it.

Dear Editor-in-Chief,

The insightful comments offered by the respected reviewers on the article entitled "**Design and validation of functional cardiorespiratory exercise field tests in women volleyball players: a pilot study**, the required modifications were accordingly done to the revised draft, in the text as a blue. The whole manuscript was re-checked, and the necessary grammar changes were made in green. The references provided in this letter were also included in the manuscript.

Answer to comments

Reviewer 1:
Dear author
• Your article is well written. However, consider the following points as suggestions for amendment:
• Part of the study in the field of cardiovascular function should also consider health. Please also look briefly at the introduction and discussion about possible health aspects in the field of sports medicine. Were done in paragraph introduction.
• Note that all readers of specialized sports articles, for example, briefly explain in the introduction and explain how short-term tests can experience cardiorespiratory function. Were done in paragraph introduction.
• Please use the same terms throughout the article for the same concepts. The purpose is to integrate and make the article understandable. The full text was reviewed and was done.
• Given the number of references, it seems that the background literature has not been well studied. It is possible to consider the scope of further references by considering the points mentioned. They were done using references of the relationship between exercise and cardiovascular health and were marked in blue in the reference list.(Rezaei et al., 2021; Maleki et al., 2019)
• The article needs minor corrections.
Reviewer 2:
the manuscript is well in written and methodology but some corrections are needed which are listed below:
1. all keywords should be in Mesh.
2. all parts of manuscript needed grammatical editing. Were done.

3. all "et al" words should be in italic form. Were done.
4. references need to correction according to format of journal. Were done. The desired format was downloaded from the journal site and was configured using the instructions according to the instructions.

Best Regard
